ABOUT

Engineer with **10+ years of experience** and **40+ shipped web and mobile apps**. I bring together frontend, backend and AI — delivering features **end-to-end**, from the interface, through the API and database, to deployment. I work remotely with clients from Switzerland, Germany, Japan and Norway. I build interfaces that leave a mark.

SELECTED PROJECTS

ERES Partner MOBILE · REACT NATIVE

A mobile app for ERES partner drivers — **servicing 1000+ users**. Built on the latest React Native (Expo SDK 54, New Architecture): push notifications, secure auth and crash monitoring. I owned the architecture, delivery and release — **the app is live on Google Play and the App Store**.

RelOnion FULLSTACK · WEB & MOBILE

A new module for an asset-reliability and maintenance platform serving clients in Poland and Norway. I worked **end-to-end** — from the interface (web and mobile), through the REST API, to the database model and authorization. Device data presented in clear dashboards.

Apex FRONTEND · FINTECH

An interface for managing complex **trade finance** programs for a Swiss client. It streamlines work with financial instruments and transaction data. **Monorepo** architecture with a shared component library and a consistent design system; auth via Keycloak.

SCSK FRONTEND · ENERGY

A product UI for energy management for Japan's SCSK Corporation. Focused on clear visualization of energy usage plus convenient monitoring and control. Internationalization and components built on Vuetify, containerized with Docker.

Impeccable.ai FRONTEND · AI PLATFORM

An interface for an AI-developer platform. The app connects to backend services over gRPC, with a focus on making complex flows and configuration readable. End-to-end tests in Cypress.

[Vue](#) · [TypeScript](#) · [gRPC](#) · [Cypress](#)

plus TVP, Noxa, PlanEasily and more.
